Re: Transmittal of Final Phase I ESA Report
Home Depot Site – San Bernardino, CA (SS-00936-2007)

Dear Ms. Strawn:

Attached is a CD-ROM containing an electronic copy of our final Phase I ESA report for the vacant land located on the southwest corner of Highland and Arden Avenues in the City and County of San Bernardino, California (the "Site"). This report has been reviewed by Anna Amarandos of Rutan & Tucker, LLP. SGI did not identify any RECs for the Site.

Please contact me with any questions or comments.

Very truly yours,

Robert J. Stechmann, Jr., CEG, CHG, REA
Principal

LIMITATIONS

Stechmann Geoscience, Inc. (SGI) performed the professional services cited herein in conformance with the ASTM standard for Phase I Environmental Site Assessments. SGI believes the analysis performed and the conclusions and recommendations developed to be accurate and relevant; however, SGI cannot accept responsibility for the accuracy or completeness of available documentation or possible withholding of information by the interviewees, regulatory agencies, or other private parties.

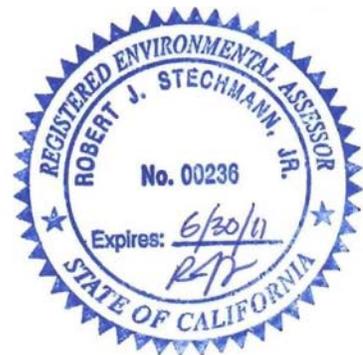

It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from data obtained from limited research and property evaluation completed within the scope and budget of the contract. Furthermore, no investigation can absolutely rule out the existence of any hazardous materials at a given property. This assessment of the approximately 18.23-acre commercial property located on the southwest corner of the intersection of Highland and Arden Avenues in the City and County of San Bernardino, California ("the Site"), was based upon prior site history and observable conditions and activities present at the time of the site visit and should not be relied upon to represent conditions or activities at later dates.

This report has been prepared solely for the use of Home Depot U.S.A., Inc., its agents, and its legal counsel, as it pertains to the Site. The objective of this assessment was to identify and characterize to the extent reasonably possible, environmental conditions associated with the Site as defined in the ASTM Standard Practice. The contents of this report may not be used or relied upon by any other party, other than the aforementioned entities, without the express written consent of SGI.

SGI objectively conducted this assessment using that degree of care and skill ordinarily exercised under similar circumstances by professional environmental consultants practicing in this or similar localities. No other warranty, either expressed or implied, is made as to the professional opinions presented in this report.

SGI QUALIFICATIONS

Mary Frances Stechmann has 21 years professional experience in soil and groundwater investigation and remediation, geology, hydrogeology, and environmental regulations. She has extensive experience in performing technical quality assurance/quality control (QA/QC) reviews of professional reports and related documents. Ms. Stechmann's direct project experience includes both managing and conducting underground storage tank removals and investigations, site assessments and characterizations, remediation programs, and Phase I and II environmental site assessments at a wide range of commercial and industrial facilities. She received a B.S. in Geology from University of California, Riverside in 1982 and completed graduate courses in geology and hydrogeology at California State University, Los Angeles. Ms. Stechmann received her Registered Environmental Assessor certificate in 1990.

Robert J. Stechmann, Jr. has 27 years professional experience in hazardous waste management, hydrogeology, and geotechnical engineering. He has conducted and managed projects involving environmental due diligence, Phase I and II environmental site assessments, remedial investigations and feasibility studies (RI/FSs), remediation design and implementation including vapor extraction, bioventing, bioremediation, and pump-and-treat systems. Mr. Stechmann has extensive project experience evaluating the extent of contamination and calculating remediation costs for petroleum hydrocarbon, chlorinated solvent, heavy metal, and pesticide/herbicide contaminants. For the last 20 years, he has worked with oil companies, industrial and manufacturing companies, law firms, real estate developers, and water districts assessing environmental issues in California, Arizona, and Hawaii. Mr. Stechmann received a B.A. in Geology from University of California, Santa Barbara in 1982 and completed graduate courses in geology and hydrogeology at California State University, Los Angeles. He holds the following registrations and licenses: Registered Environmental Assessor I, Registered Geologist, Certified Hydrogeologist, Certified Engineering Geologist, and General Engineering Contractor (Class A) - Hazardous Substances Removal and Remedial Actions.

EXECUTIVE SUMMARY

Stechmann Geoscience, Inc. (SGI) was retained by Home Depot U.S.A., Inc. (Home Depot) to conduct a Phase I Environmental Site Assessment (ESA) of the approximately 18.23-acre commercial property located on the southwest corner of the intersection of Highland and Arden Avenues in the City and County of San Bernardino, California ("the Site"). This Phase I ESA was conducted because Home Depot is planning on purchasing a portion of the Site from the City of San Bernardino Redevelopment Agency. At the time of SGI's site visit, the Site was vacant land with remnants of former residential streets still present.

Historical information obtained by SGI indicated that Site formerly contained numerous two-story apartment buildings collectively referred to as the Del Rosa Apartments. The apartments were constructed in the mid-1960s and demolished starting in 2002. The entire Site was demolished around 2009. Prior to the apartments, the Site was used for agricultural purposes (citrus crops) from sometime before 1930.

SGI developed the following conclusions and recommendations for the Site based on the findings of this assessment.

- The Site is located in the San Bernardino Valley near the base of the San Bernardino Mountains. Shallow soil underlying the Site is believed to be coarse-grained. The estimated depth to groundwater is approximately 150 feet below ground surface with an estimated flow direction to the south.
- The review of available environmental government databases revealed that:
 - 1) The Site was not listed on any of the databases searched.
 - 2) Thirty-eight (38) sites are located within a 1-mile radius of the Site. None of the 38 sites are considered to be of environmental concern to the Site.
 - 3) Sixteen (16) orphan entries (inadequate address information) were reported in the vicinity of the Site. None of these entries were considered to be of environmental concern to the Site.
- No environmental concerns regarding the Site were identified from Sanborn maps, historical aerial photographs, topographic maps, or city directories.
- SGI did not identify any Recognized Environmental Conditions (RECs) or historical RECs as part of this assessment. However, there is one issue discovered that should be noted:
 1. Because of the former agricultural use, it is possible that shallow soils on the Site contain residual concentrations of pesticides/herbicides. If present, SGI does not believe the

residual pesticide concentrations pose a significant threat to human health or the environment. Residual pesticide concentrations, if any, would have been likely minimized by grading operations when the apartments were constructed and further during the current proposed redevelopment grading. Since the residual concentrations have not been confirmed to be present and/or above action levels, SGI does not believe this qualifies as a historical REC.

- SGI makes the following recommendations for the Site:
 1. Due to decades of agricultural use, shallow soil on the Site may contain residual concentrations of various pesticides, herbicides, and/or insecticides. If shallow soil is excavated and removed from the Site, SGI recommends that representative samples be collected and analyzed to determine appropriate disposal options for the soil.
 2. No other assessment or remediation of the Site is believed warranted or necessary at this time.

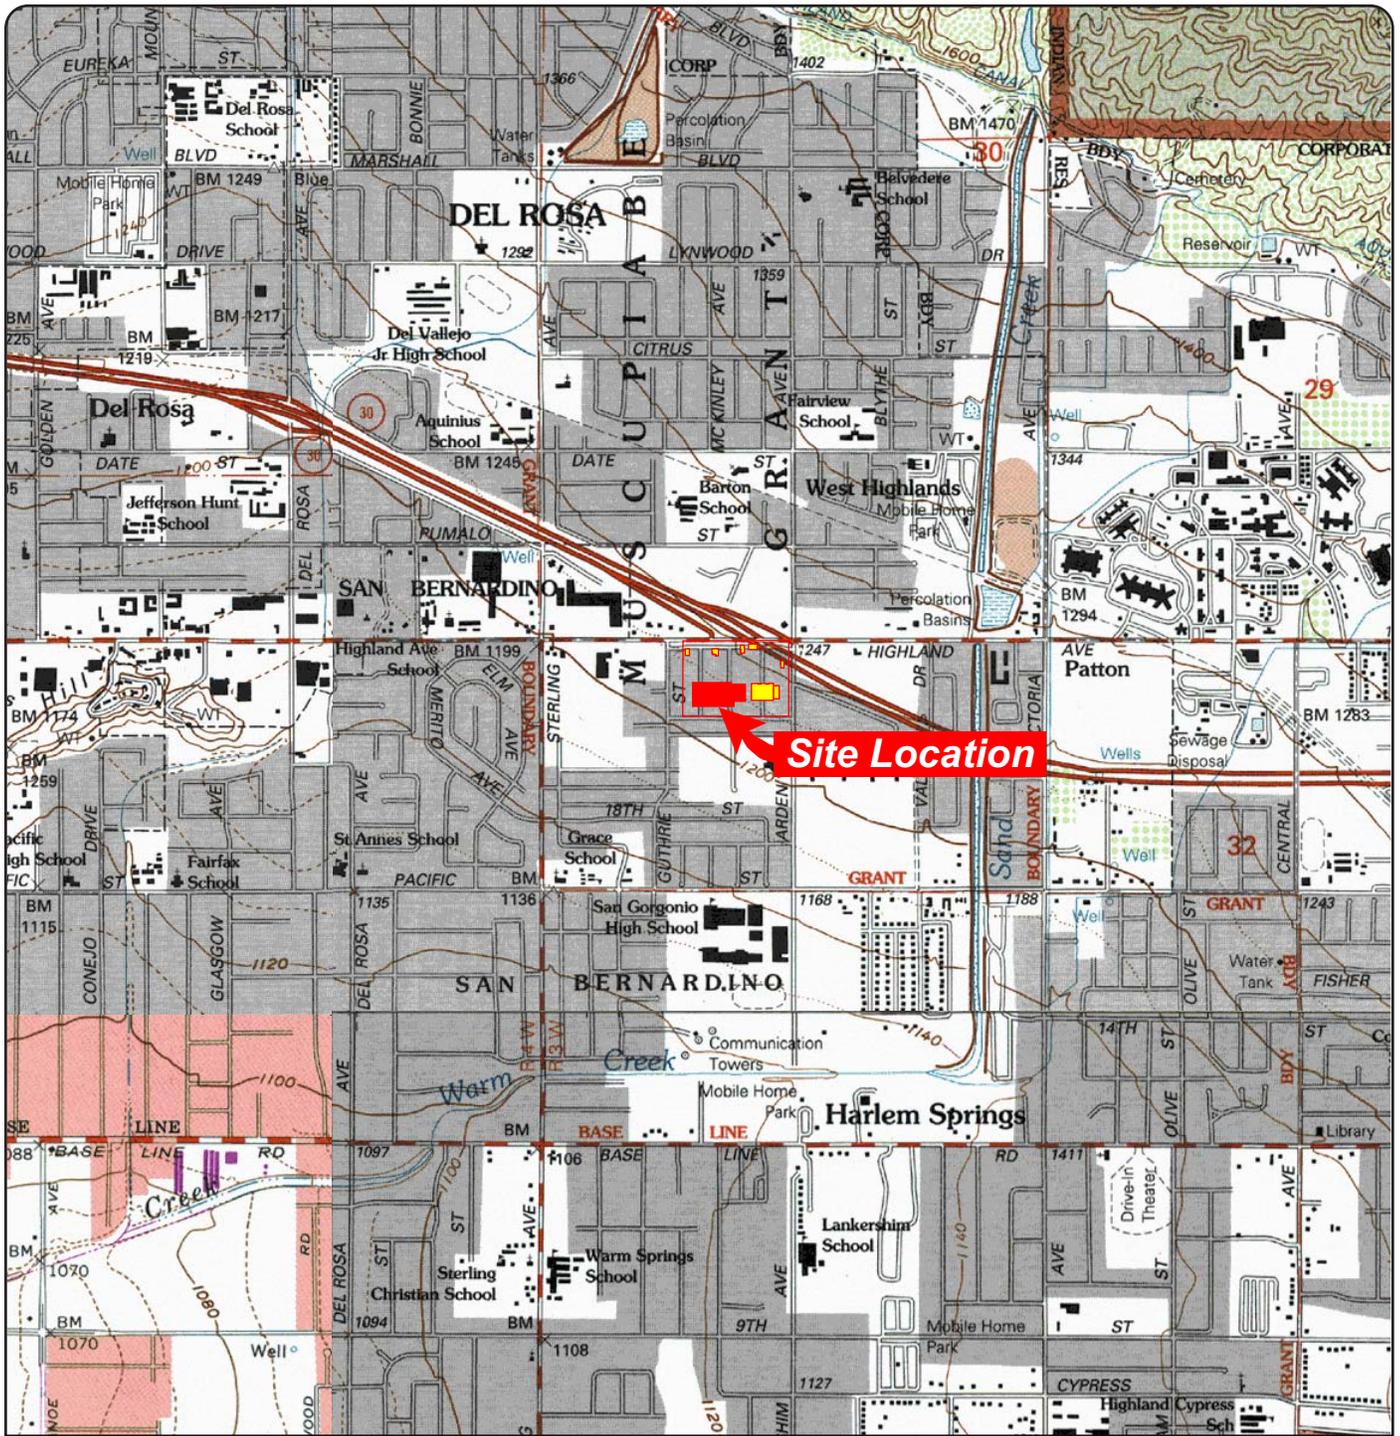

1.0 INTRODUCTION

Stechmann Geoscience, Inc. (SGI) was retained by Home Depot U.S.A., Inc. (Home Depot) to conduct a Phase I Environmental Site Assessment (ESA) of the approximately 18.23-acre commercial property located at the southwest corner of the intersection of Highland and Arden Avenues in the City and County of San Bernardino County, California ("the Site", see Figure 1). The Site was vacant land that formerly contained 66 apartment buildings collectively known as the Del Rosa Apartments. This Phase I ESA was conducted because Home Depot was planning on purchasing a portion of the Site from the San Bernardino Redevelopment Agency to operate a home improvement center.

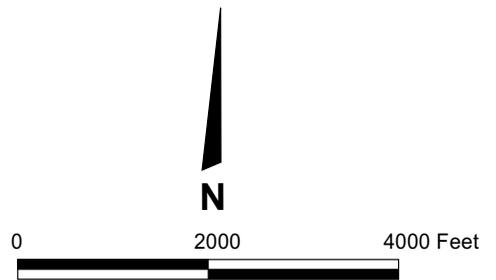

The objective of this assessment was to identify and characterize, to the extent reasonably possible, environmental conditions associated with the Site as defined in ASTM E 1527 - 05 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and Home Depot's *Annotation to the ASTM Phase I Practice*. This assessment was conducted in accordance with SGI's proposal dated 11 February 2011, and the scope of work included the following components:

- A review of available environmental government databases for the Site and for sites within an approximate minimum search distance of the Site,
- A regulatory agency file review,
- A review of historical aerial photographs, topographic maps, and oil and gas maps,
- A site visit, and
- Interviews with knowledgeable parties.

The results of SGI's assessment of the Site are presented in this report. Our conclusions and recommendations are based upon the above components. No intrusive testing or collection and analysis of any samples were conducted. The information provided to SGI by others was not verified; however, there was no reason to question the quality, completeness, or accuracy of the information received. Consequently, this report is accurate and complete only to the extent that information provided to SGI was accurate and complete.

2.0 SITE DESCRIPTION

2.1 Site Details

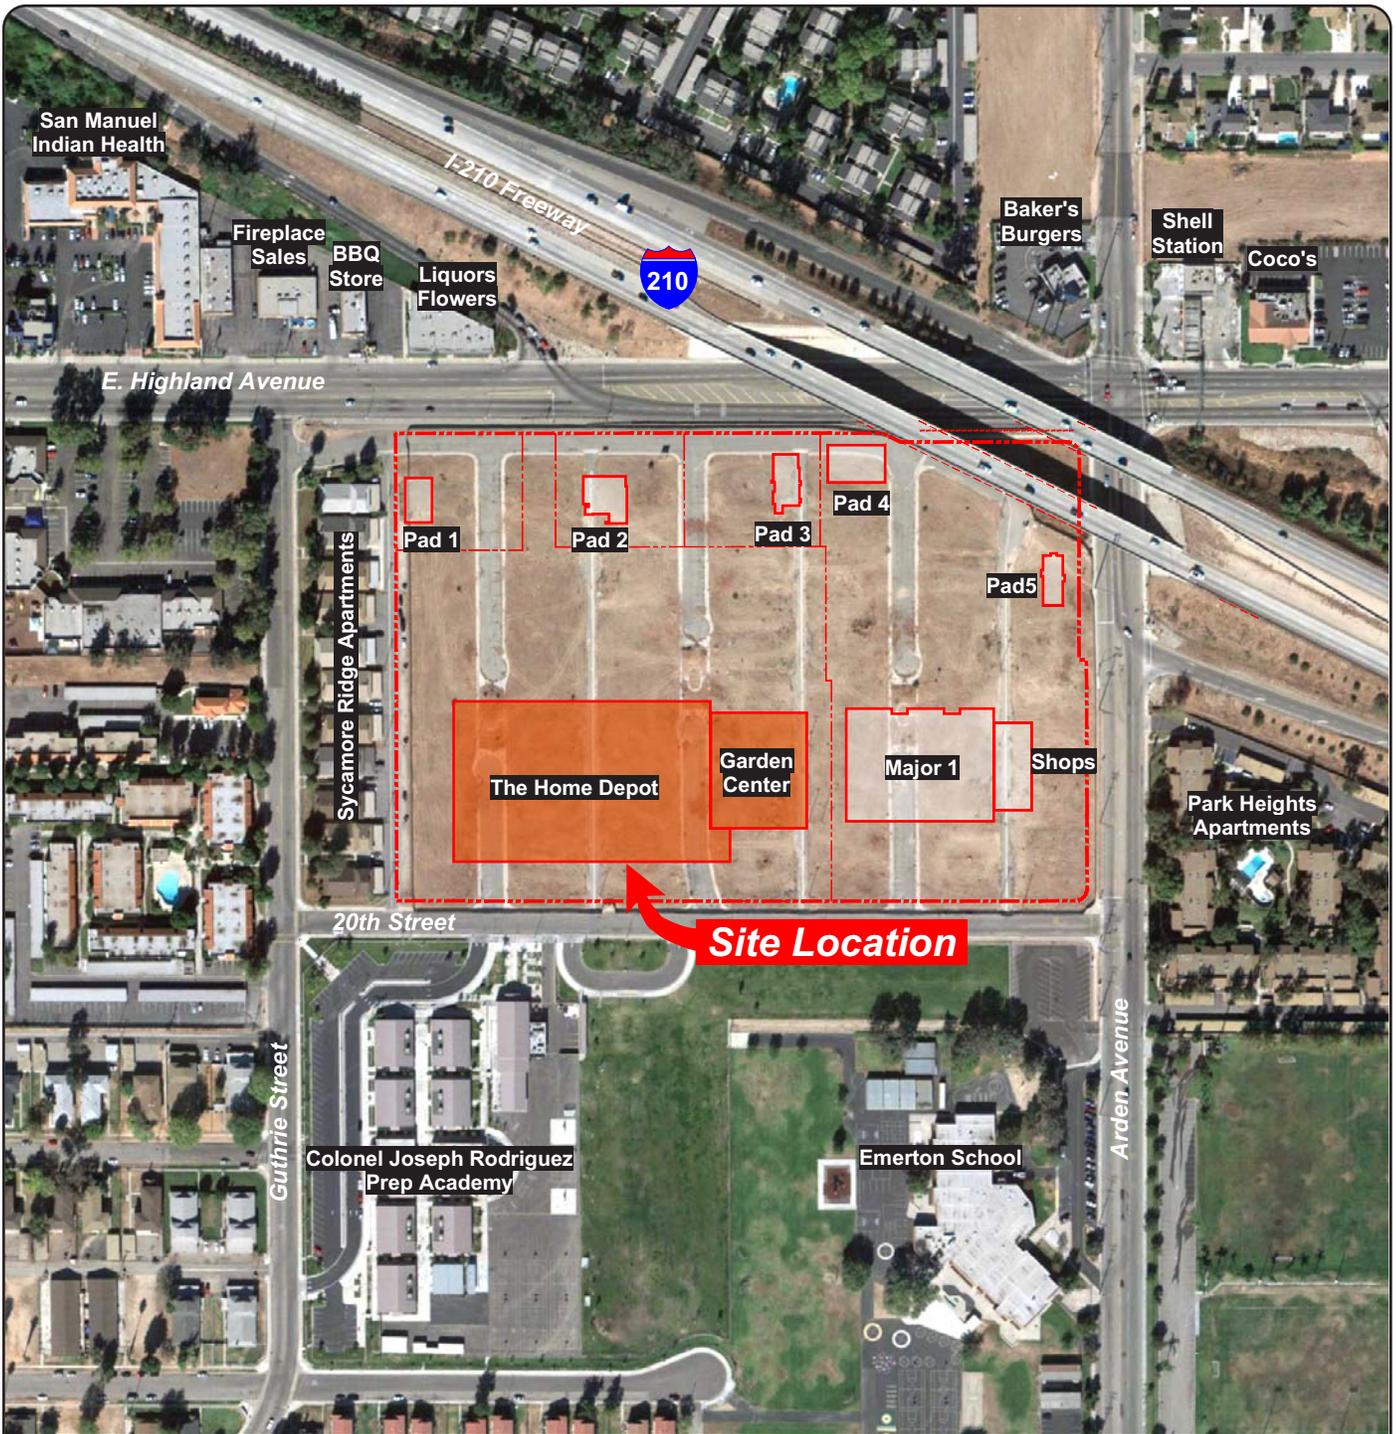

Name/Address:	Southwest corner of Highland and Arden Avenues City and County of San Bernardino, California 92404
Township/Range:	T1N, R3W, Section 31 (UTM Zone 11 X478239.6, Y3776799.8)
Latitude (North):	34.133600 - 34° 8' 1.0''
Longitude (West):	117.236000 - 117° 14' 9.6''
Assessor Parcel Nos:	1191-021-01, 1191-021-11 through 69, 1191-041-17 through 22 and 25 through 32
Current Owner:	San Bernardino Redevelopment Agency
Land Area:	18.23-acres
Current Zoning:	Not provided to SGI
Structures/Site Improvements:	No structures. Perimeter chain-link fencing. Former buildings and streets demolished to ground surface. Subsurface utilities and foundations are likely present.
Utilities:	electricity – Southern California Edison; natural gas – The Gas Company; water – San Bernardino Municipal Water Department; sewer – City of San Bernardino
Past Use(s):	Numerous apartment buildings known as the Del Rosa Apartments, agricultural (orange and/or lemon orchards)

2.2 Adjacent Properties

SGI observed the present land use of adjoining properties to assess their potential to adversely impact the Site (see Figure 2 and Appendix A). These observations were made by a brief "drive by" inspection and, in most cases, did not involve physically entering those properties. The following are adjacent to the Site:

North

- East Highland Avenue

3.0 RECORDS REVIEW

The purpose of this component of the Phase I ESA was to obtain and review records that help identify environmental conditions in connection with the Site. The sources included publicly available documents and databases that provided both reasonably current and historical information.

3.1 Physical Setting

3.1.1 Topography

The Site is located in the San Bernardino Valley at the base of the San Bernardino Mountains at an approximate elevation of 1,220 feet above mean sea level (MSL); (see Figure 1). The Site is relatively flat-lying but the entire area slopes gradually to the southwest at a rate of approximately 50 feet per mile. The San Bernardino Mountains rise abruptly approximately 1.5 miles northeast of the Site. Sand Creek, a improved flood control channel, is located approximately 3,000 feet east of the Site. This creek is one of the major drainages coming from the nearby mountains (United States Geological Survey [USGS], 1986). According to EDR (2011a), the eastern portion of the Site is located within the 500-year flood plain.

3.1.2 Geology

The Site is located in the northeastern corner of the greater Los Angeles basin, a large synclinal structure containing over 30,000 feet of marine and alluvial sediments. The Los Angeles basin is located within the Transverse Ranges geomorphic province which is characterized by east-west-trending mountains and a wide diversity of rock types (Norris & Webb, 1976). The San Bernardino Mountains contain the highest peaks south of the Sierra Nevada Mountains. The San Andreas Fault is located approximately 1.5 miles northeast of the Site. Shallow soil on the Site is Quaternary Alluvium. Predominantly coarse-grained soil (sand and gravel) are believed to be present in the uppermost 5 feet below ground surface (bgs).

3.1.3 Hydrogeology

The Site is located in the Bunker Hill Groundwater Subbasin which is administered by the San Bernardino Valley Water Conservation District. This subbasin is bounded by contact with igneous rocks of the San Bernardino and San Gabriel Mountains, the Crafton Hills, and several faults. Two aquifers (upper and lower) that consist of alluvial fan sediments of Holocene and Pleistocene age. The upper aquifer is approximately 350 feet thick and the lower one is 650 feet thick (DWR, 2004). According to 2003 data from a Texaco service station northeast of the Site, depth to groundwater was 150 feet below ground surface (bgs) with a flow direction to the south.

According to EDR (2011a), there are 66 groundwater wells within a 1-mile radius of the Site. Several of these are large municipal wells that pump tremendous volumes of groundwater such that they influence local groundwater flow directions (SBVWCD, 2011). Two wells are located on Highland Avenue just north of the Site and two wells are located southeast of the Site near the intersection of Arden and Pacific Streets.

3.1.4 Radon

The USEPA and the State of California conducted a statewide radon survey in randomly selected residences from 1986 to 1992. According to information compiled by EDR (2011a), 11 sites in the ZIP code of the Site were tested, and the average radon concentration of 1 picoCurie per liter (pCi/L) were calculated for first-floor living areas. No radon concentrations were reported for second-floor living areas or basements. All of the 11 tests contained radon concentrations less than 4 pCi/L, the continuous exposure limit established by the USEPA and Centers for Disease Control (CDC). USEPA and CDC recommend that further testing or remedial action be conducted at sites with radon concentrations greater than 4 pCi/L. The statewide radon survey results are a good screening tool to predict anticipated radon concentrations at a particular site. If more definitive results are needed, a radon survey would be required in buildings constructed on the Site.

3.1.5 Wetlands and Endangered Species

Since this Site was an existing residential development (numerous apartment buildings), no evaluation of wetlands or endangered species was completed or deemed necessary.

3.2 Regulatory Database Review

Through EDR, SGI conducted a review of regulatory databases in order to assess the potential for soil and/or groundwater contamination on the Site due to on- and offsite sources. The approximate minimum search distances from the Site either met or exceeded the distances set forth in ASTM E 1527 – 05. EDR provided information from both Federal and State ASTM standard and supplemental databases. Each database accessed by EDR is described in further detail in their report (2011a) in Appendix B.

EDR accessed the most recent version of environmental government databases available. Some of these databases have not been updated by regulatory agencies for periods of up to 1 year (depending on database and agency). The database search reported herein, therefore, will not necessarily include all facilities or sites recently identified as having, or suspected of having, environmental issues and for which an environmental investigation/listing has been initiated, subsequent to the last update of a given list.

The Site was not listed in any of the databases accessed by EDR.

Thirty-eight (38) sites in the vicinity of the Site were identified on the databases searched by EDR. Of these 38 sites evaluated by SGI, only nine were listed on databases indicating some type of release had occurred. Of these nine sites, three were located either within ¼ mile and/or within a 1-mile radius upgradient of the Site. The regulatory status of each release case and the potential to impact the Site are discussed in Table 2.

TABLE 1. SUMMARY OF REGULATORY DATABASE SEARCH RESULTS FOR SITES WITH DOCUMENTED RELEASES WITHIN ¼ MILE AND UPGRAIDENT WITHIN A 1-MILE RADIUS			
Site	Location Relative To Site	Database	Regulatory Status/Comments
Elementary School #47 20 th St/Guthrie Str San Bernardino, CA 92404 (EDR Map ID 1)	~50 feet south downgradient	SCH, ENVIROSTOR	DTSC supervised the investigation and removal of former agricultural row crop pesticide/herbicides in shallow soil. Case closed in October 2002. This school is also known as the Joseph C. Rodriguez Prep Academy which is just south of the Site.
Highland Texaco 2402 Highland Ave San Bernardino, CA 92346 (EDR Map IDs B10, B13, B14, B18)	~100 ft northwest up- to crossgradient	LUST, UST, Hist CORTESE, HAZNET, RCRA-SQG	Gasoline release to soil only discovered in 1998. Lead agency (Regional Water Quality Control Board – Santa Ana Region [RWQCB]) granted closure on March 31, 2003. Reported disposal of 4.6 tons of waste and mixed oil.
Exxon 2402 Highland Ave San Bernardino, CA 92346 (EDR Map IDs B11, B12, B17)		Hist UST, LUST, Hist CORTESE, SWEEPS UST, HAZNET	Five underground storage tanks (USTs) installed in 1967 and 1975 in sizes ranging from 280 to 8,000 gallons. Gasoline release to soil only closed by lead agency in October 1987. Disposal of 1.25 tons of empty containers.
Highland Shell 2402 Highland Ave San Bernardino, CA 92346 (EDR Map ID B15)		San Bern. Co. Permit	Permits for the various USTs onsite. Not believed to be an environmental issue because of regulatory agency involvement and case closed status.
EXXON Station #35 EXXON Station #3506 Abedi's EXXON 1998 Highland San Bernardino, CA 92713 (EDR Map IDs C21, C22, C23, C24)	~1/4 mile west- northwest crossgradient	Hist CORTESE, LUST, Hist UST,	Gasoline release to soil only reported in December 1987. RWQCB closed case in March 1990. Four USTs reported onsite installed in 1967 (1 550 gal and 3 8,000 gal). Not believed to be an environmental issue because of crossgradient location and case closed status.

Based on the information reviewed from the EDR report, SGI does not believe that any of the 38

listings identified by EDR are of environmental concern to the Site.

The EDR report also indicated there was poor or inadequate address information for sixteen (16) entries located in the vicinity of the Site; therefore, those entries were not mapped by EDR (Orphan Summary, Appendix B). Twelve (12) of these 16 entries were listed on databases that did not indicate a release had occurred (e.g., RCRA-LQG, San Bern. Co. Permit). One listing was for Fort Irwin which is approximately 100 miles north. Three of the remaining four sites were located by SGI and found to be over 1 mile away from the Site. One entry – Caltrans on E Highland Ave could not be located. None of the orphan entries are believed to be of environmental concern to the Site.

3.3 Regulatory Agency File Review

SGI conducted a search for records regarding the property at various regulatory agencies. The lack of specific addresses complicated this search since there were over 40 apartment buildings on the Site previously. A discussion of the local agency records search follows in Sections 3.3.1 through 3.3.7.

3.3.1 San Bernardino Building Department

SGI reviewed computerized permit records at this agency on 24 February 2011. The only records found pertained to the construction and modification of the apartment buildings in the mid 1960s and later.

3.3.2 San Bernardino Fire Department

SGI contacted both the city and county fire departments on 24 February 2011 and later learned that no records existed for the Site.

3.3.3 San Bernardino County Environmental Health Department

SGI contacted this agency on 24 February 2011 and was informed there were no available records for the Site.

3.3.4 Department of Toxic Substances Control (DTSC) – Cypress and Glendale Offices

SGI contacted this agency and was informed by the Cypress office on 23 March 2011 that no records existed for the Site. The Glendale branch responded later and also indicated no records were available.

3.3.5 California Regional Water Quality Control Board – Santa Ana Region (RWQCB)

SGI contacted this agency and was informed on 23 March 2011 that no records were available for the Site.

3.3.6 South Coast Air Quality Management District (SCAQMD)

SGI contacted this agency and the SCAQMD responded on 25 March 2011 with three records for the Site. All three involved inspections of demolition work and a concern about asbestos. These inspections occurred at 2004 Dumbarton and 2004 Newcomb on 29 August 1996 and another on 18 November 1996 at 2000 Newcomb. Reportedly 15-20 homes were being demolished in November 1996.

3.4 Previous Reports and Documents

SGI did not identify, nor was provided, any previous environmental reports or studies of the Site.

3.5 Historical Use Information

The objective of consulting historical sources is to develop a history of the previous uses of the Site and surrounding area, in order to help identify the likelihood of past uses having led to potential environmental conditions in connection with the Site. SGI obtained and reviewed the sources listed in this section to reconstruct historical use of the Site.

3.5.1 Sanborn Maps

Sanborn maps were developed by the fire insurance industry to characterize types of building use in urban areas to determine premium costs. Because of their historic coverage, starting in the late 1800s, historic land use for a property can often be reconstructed from a review of these maps. No Sanborn maps, however, were identified by EDR (2011b) for the Site (see Appendix C).

3.5.2 Aerial Photographs

SGI reviewed the following historical aerial photographs provided by EDR (2011c). Copies of these photographs are included in Appendix C, and a summary of SGI's interpretation follows.

YEAR FLOWN	FLYER	SCALE
1930	Fairchild	1" = 666'
1938	Laval	1" = 555'
1953	Southwestern	1" = 555'
1966	Universe	1" = 555'
1977	Teledyne	1" = 666'
1989	USGS	1" = 666'
1994	USGS	1' = 666'
2002	USGS	1" = 666'

YEAR FLOWN	FLYER	SCALE
2005	EDR	1" = 604'

In the 1930 aerial photograph, the Site appeared to be agricultural land. Most all of the land visible in the photo had distinctive crop patterns. The area of the Site appeared to be orchards (most likely orange and/or lemon). Highland Avenue and Arden Street and others were visible as dirt roads.

In the 1938 aerial photograph, even more orchards were present in the photograph.

In the 1953 aerial photograph, the Site appeared unchanged from the earlier photos.

Major changes to the Site were visible in the 1966 photograph. Sixty-six buildings (believed to be apartment buildings) were present on the Site. Most of the row crops seen in earlier photographs have been replaced by residential development. Two large retail centers were located west of the Site on the intersection of Highland and Del Rosa Avenues.

In the 1977 photograph, the 215 freeway was under construction with progress stopping right at Arden Avenue. The current Emerton elementary school was present south of the Site along Arden Avenue. No agricultural activities were visible in the photograph.

The 1989 aerial photograph showed no changes to the Site. The 215 freeway had not been completed and it appeared to end at Arden Avenue.

The Site appeared unchanged in the 2002 aerial photograph. The 215 freeway had been completed east of Arden Avenue evidenced by two elevated bridges.

In the 2005 aerial photograph, approximately half of the apartment buildings on the Site had been demolished. Apartment buildings were present south of 20th Street and the prep academy had not been constructed yet.

No potential environmental conditions affecting the Site and immediately adjacent properties were identified by SGI on the aerial photographs reviewed.

3.5.3 Topographic Maps

SGI reviewed the following historical topographic maps dated 1901, 1954, 1967, 1973, 1980, 1988, and 1996 provided by EDR (2011d). Copies of these maps are included in Appendix C, and a summary of SGI's interpretation follows.

No structures were shown on the Site or in the immediate area on the 1901 or 1954 maps. The Site area is shown as urban development with several streets present in the 1967 map. The Site was depicted in the same configuration on the 1973, 1980, 1988, and 1996 maps.

No potential environmental conditions affecting the Site were identified from a review of the historical topographic maps.

3.5.4 Oil and Gas Maps

SGI reviewed the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Reference Map K (1986) for information concerning oil and gas production, and the potential presence of methane zones in the vicinity of the Site. There is no oil or gas wells shown in the entire 36 square-mile township and range where the Site is located (see map in Appendix C). SGI does not believe there is any environmental concern to the Site due to oil or gas wells.

3.5.5 City Directories

EDR provided a City Directory report of the Site and surrounding area (see Appendix C). According to this directory report, the earliest listing for the Site was in 1991 for numerous individuals (presumed to have resided in the various apartment buildings). The following addresses were listed for the Site by street:

Street Name	Addresses
Dumbarton	2005, 2028, 2029, 2050, 2073, 2122, 2123, 2140, 2141, 2158, 2159, 2176, and 2177
McKinley	2005, 2073, 2094, 2104, 2105, 2122, 2140, 2141, and 2158
Newcomb	2005, 2028, 2051, 2073, 2051, and 2073

No environmental issues were identified from a review of the city directory report.

4.0 SITE RECONNAISSANCE

The objective of the site reconnaissance was to obtain information indicating the likelihood of identifying environmental conditions in connection with the Site. This objective was accomplished by conducting both site visits and interviews of knowledgeable parties.

4.1 Site Visit

SGI visited the Site on 14 February 2011 and documented its condition with photographs (see Appendix A). The Site was vacant land surrounded by a chain-link fence on the perimeter. All aboveground structures associated with the former apartment buildings had been removed. The street outlines could still be seen in areas. Fire hydrants were left in place and observed throughout the Site. Two telephone boxes were located on 20th Street. No evidence of oil leakage from the transformer was noted. The asphalt pavement on 20th Street was in poor condition.

No environmental issues were identified during the site visit. In addition, no evidence of USTs, ASTs, drums, containers, PCB-containing equipment, corrosion, pits, lagoons, stressed vegetation, solid waste, waste water, wells, or septic systems were observed and no odors were noted on the Site during SGI's site visit.

4.2 Interviews

SGI interviewed the following individuals to obtain information regarding former and current uses of the Site. The information obtained is summarized below.

Brian Turnbull – Project Manager San Bernardino Redevelopment Agency (oral communication, 25 February 2011)

Mr. Turnbull indicated his agency had acquired the Site in pieces over the last 15 years. The final acquisition was made two or three years ago. The former apartment buildings were demolished as acquired by the city. After the entire property was obtained, the city demolished the entire site removing everything but the streets. The subsurface utilities and any septic systems were left in place. Mr. Turnbull believed the apartments were built in the mid-1960s and by the late 1980s the area had become blighted. SGI inquired about possible meth labs on the property and Mr. Turnbull indicated his agency had no records of any. He was not aware of any previous environmental reports or any environmental issues associated with the Site.

5.0 FINDINGS AND CONCLUSIONS

SGI performed a Phase I Environmental Site Assessment of the 18.23-acre commercial property located on the southeast corner of the intersection of Highland and Arden Avenues in the City and County of San Bernardino, California. This Phase I ESA was conducted in conformance with the scope and limitations of the ASTM standard for Phase I ESAs. There were no exceptions to, or deletions from, this practice. Based on SGI's research, it appears that the Site was used for agricultural purposes (citrus crops) from sometime before 1930 until numerous apartment buildings were constructed prior to 1966. The apartment buildings began to be demolished around 2002 and the area was completely cleared by 2009. This assessment revealed no evidence of Recognized Environmental Conditions (RECs) or historical RECs in connection with the Site but the following should be noted:

1. Because of the former agricultural use, it is possible that shallow soils on the Site contain residual concentrations of pesticides/herbicides. If present, SGI does not believe the residual pesticide concentrations pose a significant threat to human health or the environment. Residual pesticide concentrations, if any, would have been likely minimized by grading operations when the apartments were constructed and further during the current proposed redevelopment grading. Since the residual concentrations have not been confirmed to be present and/or above action levels, SGI does not believe this qualifies as a historical REC.

6.0 RECOMMENDATIONS

Based on the findings and conclusions of this assessment and our professional experience, SGI makes the following recommendations for the 18.23-acre commercial property located on the southeast corner of the intersection of Highland and Arden Avenues in the City and County of San Bernardino, California.

1. Due to decades of agricultural use, shallow soil on the Site may contain residual concentrations of various pesticides, herbicides, and/or insecticides. If shallow soil is excavated and removed from the Site, SGI recommends that representative samples be collected and analyzed to determine appropriate disposal options for the soil.
2. No other assessment or remediation of the Site is believed warranted or necessary at this time.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/08/2010 has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/08/2010 has revealed that there are

Registry ID: 110002928761

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 02/14/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/30/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 12/30/2010
Number of Days to Update: 57	Next Scheduled EDR Contact: 04/11/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/11/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA
Date Data Arrived at EDR: 12/01/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 12/01/2010
Number of Days to Update: 86	Next Scheduled EDR Contact: 03/14/2011

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 12/10/2010
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/28/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/08/2010	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/17/2010	Telephone: 916-323-3400
Date Made Active in Reports: 01/25/2011	Last EDR Contact: 02/08/2011
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/23/2011
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/03/2010	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/30/2010	Telephone: 202-307-1000

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

	Data Release Frequency: Semi-Annually

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/13/2010	Telephone: 202-566-0250
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 12/17/2010
Number of Days to Update: 36	Next Scheduled EDR Contact: 03/14/2011
	Data Release Frequency: Annually

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/29/2010
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/11/2011
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 02/28/2011
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 02/28/2011
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 04/24/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/29/2010	Telephone: 202-564-5088
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 12/23/2010
Number of Days to Update: 18	Next Scheduled EDR Contact: 04/11/2011
	Data Release Frequency: Quarterly

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/21/2011
Number of Days to Update: 98	Next Scheduled EDR Contact: 05/02/2011
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/18/2010	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/06/2010	Telephone: 301-415-7169
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 12/13/2010
Number of Days to Update: 51	Next Scheduled EDR Contact: 03/28/2011
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011	Telephone: 202-343-9775
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (415) 947-8000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 12/10/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 03/28/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2007	Source: EPA/NTIS
Date Data Arrived at EDR: 02/25/2010	Telephone: 800-424-9346
Date Made Active in Reports: 05/12/2010	Last EDR Contact: 11/30/2010
Number of Days to Update: 76	Next Scheduled EDR Contact: 03/07/2011

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2009	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/07/2010	Telephone: 916-255-1136

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Next Scheduled EDR Contact: 04/04/2011

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

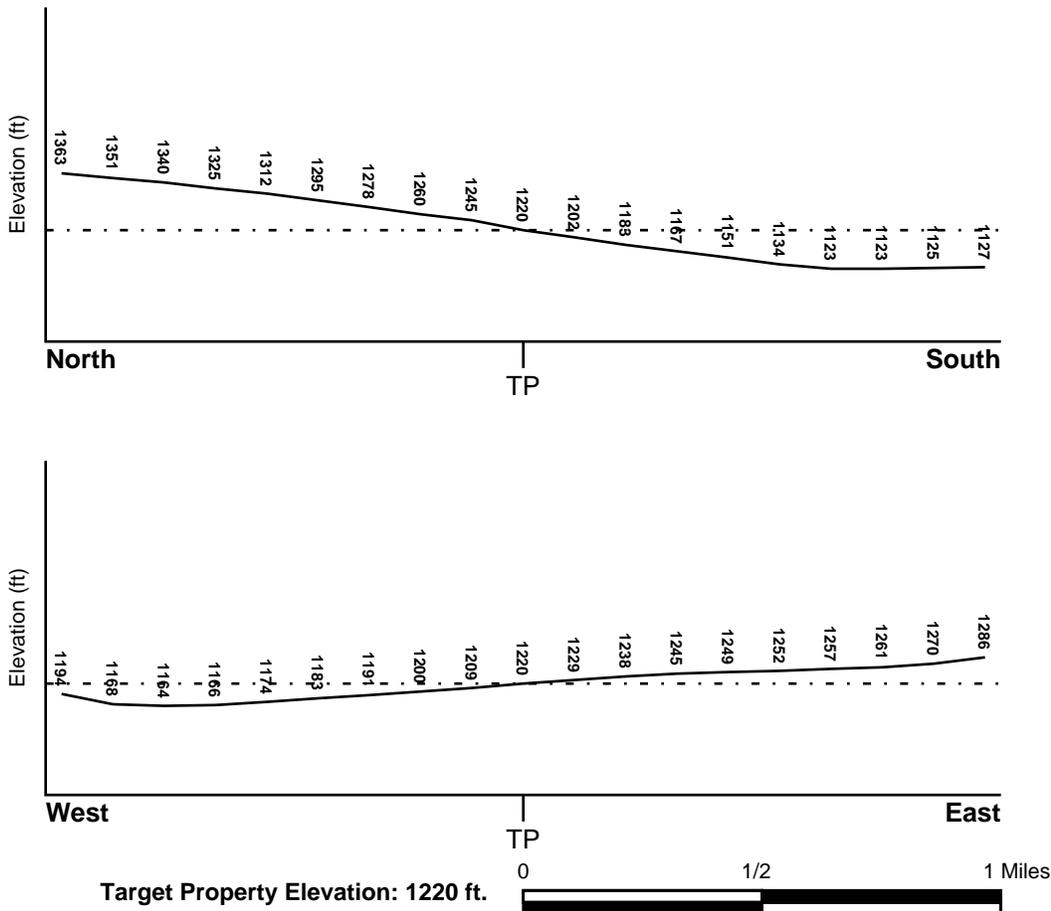

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
SAN BERNARDINO, CA

FEMA Flood
Electronic Data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
NOT AVAILABLE

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
3	1/8 - 1/4 Mile NNE	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6
2	16 inches	50 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6
3	50 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Stechmann Geoscience Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2003. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.
