

Your Rates Are Changing

Preparing for the Change

You Have a Right to Know...

exactly what's going on with your electric bill. That's why we are letting you know about anticipated rate increases up front. We are communicating with you early and often so you are prepared for the change.

What's In It for You?

We want you to know what you're getting for your money. We are building a cleaner, smarter grid with new technology to make your power safer and more reliable. And, our online tools give you more control over your energy use.

Crews In Your Community

You'll see crews out in your community making upgrades to the grid, like replacing poles to strengthen our lines and make them more reliable. Our skilled workforce repairs poles, lines, transformers, and substations, and works overtime during emergencies.

It's a Two-Way Street

We can't ask you to do something we're not willing to do ourselves, so at SCE, we're lowering our own costs so we can keep rates reasonable.

Tools to Help

We have a variety of tools to help you manage your energy use.
